DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 16, 2009 has been entered.

Claims 1-35 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to an apparatus and a method for a communication apparatus. More specifically, applicants have designed an apparatus and method that includes a transmission modulator for impulse modulating transmission data into subcarrier modulation signals using a plurality of subcarriers. In addition, applicants designed a transmission part for generating a plurality of subcarrier-transmission signals by amplifying the plurality of subcarrier modulation signals and a filter section for filtering the plurality of subcarrier-transmission signals, the subcarrier-transmission signals being band-limited within a bandwidth allocated for each of the subcarriers the subcarrier transmission signals having a cumulative bandwidth narrower than a bandwidth of the subcarrier modulation signals. Moreover, the claimed invention includes a carrier control section for controlling the subcarriers for use in communication depending upon information amount, significance and communication propagation condition and an antenna section for multiplexing and radiating the filtered subcarrier transmission signals.

Applicant's independent claims 1 and 32 each recite, inter alia, being band-limited within a bandwidth allocated for each of the subcarriers the subcarrier transmission signals having a cumulative bandwidth narrower than a bandwidth of the subcarrier modulation signals; and a carrier control section for controlling the subcarriers for use in communication depending upon information amount, significance and communication propagation condition. Fullerton, Rouquette, Wright, and Abeta disclose an impulse-modulating transmission apparatus and method. However, Fullerton, Rouquette, Wright, and Abeta fail to disclose in detail applicant's claimed invention. Therefore, after a thorough search the examiner was unable to make a prima facie case of obviousness with respect to these novel features. Furthermore, the examiner would be using impermissible hindsight and applicant's specification as a roadmap in order to arrive at applicant's claimed invention. As a result, applicant's claims 1 and 32 comprise a particular combination of elements, which is neither taught nor suggested by the prior art.

Accordingly, applicant's invention is allowed for these reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
